

2022/1/26 Lee O2

① R vs RStudio

R = engine

RStudio = Dashboard

See MD Fig 1.1

You interface with

R via RStudio

Fig 1.3 → RStudio

Note console

panel. here you
will input commands
& view outputs.

RStudio Server vs
RStudio Desktop

- * Cloud version like
Google Docs via
browser
- * On your computer
like MS Word.

Note: Lab01 assumes
RStudio Server

R vs R packages
MD Fig 1.4

As a new phone,
with nothing on it.

→ Are like apps you
need to install,
and occasionally
update.

How to use R package

① You need to install it
ONCE

② Every time you want

to use it, you need
to "open" it

MD section 1.3.2

use library(w)

function
